

The Web based Antenna Controller for WTW Antenna Systems.

The WTW LSC Tracking Antennas are developed in according to the latest technology to fulfil compactness, last technology, low weight and high efficiency.

This is possible with more than 15 years experienced personal in developing robust and long-lasting mechanics and excellent RF features.

KEY FEATURES

- Completely Web based architecture
- Smart Connection via Ethernet and WIFI
- 3D Animated Model of the controlled Antenna
- Auto-, Slave-, Manual-, GPS-Tracking

How it works

The Antennas can be controlled by Computer, Smartphone, Tablet and much more because the complete web based software is running on the integrated Master Computer of the Antenna.

The Antenna has its own internal web page and can be connected through the IP-Address.

The WTW Anlagenbau GmbH is a premium manufacturer for telemetry antennas using the latest technology combined with ultimate performance for **Airplane, Helicopter, Missile and Rocket** test on **Land or Water**.

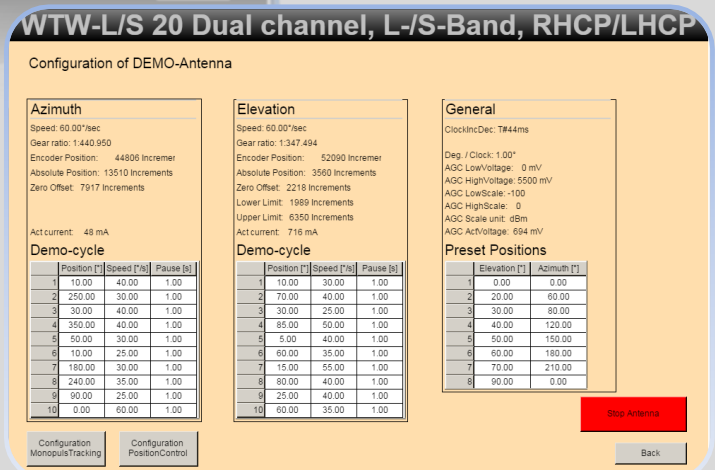

Series WTW-GUI

- Modern clean design
- Animated 3D-Model of the Antenna
- Web based Smart Connected GUI
- No Software needed
- Visual Joystick

- Various password-protected user levels, such as WTW Admin, DC Admin, Admin and Operator

- Very clean sub menus
